- Leadership Agility

TRAINER APPROVAL RATING

99% Percentage of all clients who recommend our coaches, since 2008.

Based on more than a decade of experience helping hundreds of organizations, the Agile For All team has a really good idea of what works and what doesn't. We work with key decision-makers to identify goals, assess the current state of your organization and craft a plan for change. Agile transformations take patience and dedication. Whether your transformation goals include scaling agile across multiple teams, improving effectiveness of your process, delivering more value faster, or creating a culture of high engagement, our approach helps leaders, teams, and stakeholders achieve those goals in a way that delivers sustainable improvement over time.

COACHING APPROACH

Effective Agile coaching bridges the gap between knowledge and experience. It empowers organizations to put new practices to work in their specific situations at all levels. From team performance to engineering practices to how executives support an agile culture of continuous improvement, our coaching approach is different from most. Instead of long term embedded coaching, we use an iterative approach, working with your leaders and teams for two to three days at a time, returning periodically to help you take the next step. Over the course of several cycles, leaders and teams develop Agile mastery at a faster pace and perform at higher levels to achieve their business goals.
